

r3 • Delivering blockchain technology to transform the way the world does business

Our vision is of a world where everyone can transact directly and privately without friction; a world where business partners operate in perfect synchrony, and duplicated, inconsistent records are a thing of the past.

At R3, we operate at the center of a growing ecosystem of over 200 of the world's leading firms committed to applying blockchain technology to unlock new value across multiple industries.

Estimated operating and capital cost savings in financial services from blockchain.

The Corda platform

Blockchain for Business

In 2016 we built Corda, our open source blockchain platform in partnership with industry-leading companies. Corda delivers the benefits of public blockchains without the privacy, scalability and governance issues that make some public blockchain platforms inappropriate for businesses, especially those operating in complex and highly-regulated global markets.

In 2018 we introduced Corda Enterprise, a commercial distribution of Corda open source designed specifically to meet the demands of modern day businesses. Harnessing the unique features of our core Corda offering—Corda Enterprise is the optimal choice for organizations with additional business requirements such as deployment inside corporate data centers, 24/7 support, predictable release schedules, dedicated product management, and support for industry-standard enterprise databases.

R3 AT A GLANCE

- The only blockchain software firm that combines innovative technology, industry-wide collaboration, financial experience, and regulatory engagement.
- The R3 ecosystem includes some of the world's largest technology firms, solution providers, central banks, regulators, financial services firms, and trade associations overseeing the development of the Corda platform, blockchain for every business in every industry.
- R3 conducts breakthrough research on the topics in blockchain technology that are guiding the agenda of central banks, businesses, and governments.
- Multiple industry award recipient for Corda
- Thousands of developers across the world are contributing code to our open source blockchain platform.

“Deployment of this technology will change the structure of markets, the profit pools and the dynamics. We want to be writing the story.”

R3 MEMBER

Corda's core capabilities include:

Consensus on the data that matters

Corda is designed to bring participants to consensus on shared facts, removing the need for costly and time-consuming reconciliation.

Integrate with legacy infrastructure

Enterprise adoption will be a phased approach and Corda has been built to easily integrate and interoperate with the systems that run your business.

Privacy with provenance

Unlike traditional blockchain platforms, Corda minimizes information leakage by only sharing transaction data with participants that require it.

Apps for every industry

Corda is the gateway to a vibrant network of blockchain applications for finance and commerce, known as CorDapps, that solve complex, real world problems.

Our global ecosystem

As the largest collaborative group in enterprise blockchain, we encourage global institutions in our network to come together to develop solutions on the Corda platform that have the potential to transform industries.

Since inception, we've believed that the best ideas come from the outside. Starting with the banking sector and expanding from there, R3's proven model brings the key players in each market together to work collaboratively and openly to deliver the next generation of blockchain for business.

R3 has worked relentlessly to build a vibrant ecosystem that brings partners and members together with a shared focus on moving blockchain applications into commercial deployment to change finance and commerce from within.

R3 membership is available in several tiers and offers a range of benefits, including interactive training on Corda and blockchain, participation in working groups, access to fellow members and unlimited access to research and blockchain whitepapers.

Get to know our ecosystem participants on Marketplace, a web platform that brings R3 members and partners together to discover solutions built on Corda. Visit marketplace.r3.com

About us

R3 is an enterprise blockchain software firm working with a broad ecosystem of more than 200 members and partners across multiple industries from both the private and public sectors.

R3 is working with its global network to develop on Corda, its blockchain platform designed specifically for businesses. Corda is already being used in industries from financial services to healthcare, shipping, insurance and more.

R3's global team of over 180 professionals in 13 countries is supported by over 2,000 technology, financial, and legal experts drawn from its global member base. R3 is backed by investment of over USD 120 million from more than 45 firms.
